

(Emc2 Hybrids)

Features

- E21 Scandium Alloy Shaft
- 18, 20, 23 & 26 Degrees of Loft
- Golf Pride Tour Velvet Grip
- MRH only

Progressive Offset makes it easy to maximize trajectory for wide range of players

Low weighted internally means a low center of gravity for an easy launch

Minimum crown thickness allows for maximum CG specifications

Crown Louvers – exceptional alignment aid for improved accuracy

CST™ (Contact Signature Tuned) to E21 Scandium Shafts for true contact with ball

High strength steel face plate allows for increased ball speed, save weight for optimizing CG location

Open face angle enables user to control straighter shot pattern for wide range of players

CNC milled scorelines control width and depth dimensions for maximum allowed by USGA
